8 Year Relationship

Scale

8 Projects Delivered

Warburtons Ltd. is the largest bakers in the United Kingdom.

Ambitious market leaders, the company's tradition of baking stretches back over 140 years. We are proud of our on-going relationship with Warburtons, which has seen our specialist bakery team provide a range of services to support the company's development of new state-of-the-art production plants around the country. In all of this work we have helped the client to save energy costs and reduce its environmental impact.

We have been carrying out electrical installation works for Warburtons Ltd for the past 8 years, providing services that include full design, installation testing and the commissioning of new bread, morning goods plants and snacks plants.

We have worked on the following projects:

- West Midlands Bakery
- Bellshill Bakery
- Enfield Bakery
- Tuscany Park Bakery
- Newport Bakery
- Stockton Bakery
- Bristol Bakery
- Bolton Bakery

To streamline project delivery, our dedicated team meets with Warburtons' central engineering projects team at the early design stage of each project. They then have a close involvement with the design and layout of each plant through to completion.

A main aspect of our work with Warburtons has been identifying and putting in place energy saving solutions. These are helping the company to reach its environmental target of cutting CO2 emissions by 20% by 2020. For example, our team have designed and installed new T5 lighting solutions, which have achieved significant energy and cost savings across the company's operations.
